Step 1. Install a set of GT-40P cylinder heads from a late 1990's Ford Explorer or a set of GT40 heads from an early 1990's Mustang 5.0L. These are some of the best castings Ford ever produced for this engine, and are still fairly cheap and available used. Install a set of 1.7:1 roller-tipped rocker arms on the heads.

An engine rebuild and exchange shop is one that builds engines day-in and day-out. They are typically not performance oriented, but rather production oriented, and probably supply engines, import and domestic, to most of the repair shops in their local area. We feel that for a stock, or close to stock, short block, these shops offer a great ...

302 ENGINE. The Ford 302 engine is the most iconic engine ever built by Ford and we took it to the next level. 350 horsepower and 350 torque on the dyno, runs on 91 premium gas, and built for daily and weekend street driving. Newly offered in a "drop-it-in-and-go" package for an easy installation into your Ford Mustang, Ford Falcon, or classic Ford truck.

[302 Engine - West Coast Engines](#)

Rebuilt engines that are worn out typically have 4.030-inch bores. Small-block Fords can be bored out to 4.040 inches, but we discourage a 4.060-inch bore size. It's always a gamble until you remove the cylinder head and measure the bores. Engine building should always begin with a mental blueprint of how your engine is going to be built.

This is a long post about a serious budget build of a 300hp 302. Figure about 2000 dollars if you are a wise shopper and maybe less if you find some parts on ebay. Here we go! The block is a C8 which is a 68 302 that was bored and honed to a finish size of 4.030. 306 cubic inches. No need for decking and align boring on this one.

Step-13: Install Rear Main Seal (Professional Mechanic Tip) The rear main seal is next – installed as shown. Use a light film of silicone sealer between the seal and block. Don't use too much sealer – just a light touch. Note how the seal lip faces. It must be on the inside to ensure a positive seal.
