Answers to Exercises and Problems

Answer: The warm-up prepares the body and decreases the potential for injury. Rationale: The warm-up activity prepares the body for activity and decreases the potential for injury and should not be omitted. It usually lasts about 5 to 10 minutes and may include stretching, calisthenics, and/or aerobic activity performed at a lower intensity.

In the newly updated 7th Edition, Chemistry: A Guided Inquiry continues to follow the underlying principles developed by years of extensive research on how students learn, and draws on testing by those using the POGIL methodology. This text follows the principles of inquiry-based learning and correspondingly emphasizes underlying chemistry concepts and the reasoning behind them.
