two small fish friends. One day one of the fish grows legs! The other fish thinks that this is impossible but explains that he is a tadpole - turning into a frog.

## Fish is Fish by Leo Lionni - Goodreads

Fish is Fish raises questions about how we know things and about what might make creatures superior or inferior. Two friends, a tadpole and a fish, live in a pond until the tadpole becomes a frog and leaves. He brings back fantastic descriptions of the outside world, and the fish tries to explore this other world for himself.

## Fish Is Fish Script - ReadWriteThink.org

"Fish" has multiple meanings. First, it is the singular noun referring to an animal with a tail and fins that help him swim and live only inside the water.

This noun, anyway, is irregular, which means it doesn't simply add an "-s" in the end, to form plural. Its plural form, actually, is the same with its singular.

## Fish vs. Fishes - grammar

Fish are gill-bearing aquatic craniate animals that lack limbs with digits.

They form a sister group to the tunicates, together forming the olfactores. Included in this definition are the living hagfish, lampreys, and cartilaginous and bony fish as well as various extinct related groups.
