Life in Great Britain during the Industrial Revolution underwent rapid social and economic changes due to the developments of mechanized working methods based on the factory system and the steam engine. As a result, work became more regimented, disciplined, and moved outside the home. Large segments of the rural population migrated to the cities, causing dramatic lifestyle changes.

This work focuses on the largest cities in England, Scotland, Wales and Northern Ireland, countries which make up the United Kingdom. It provides basic history and geography with an emphasis on life in contemporary times. Other subjects covered include cultural diversity, demographic composition and many other aspects of life in the nation's largest urban centres. The United Kingdom is one of the most urbanised countries in the world and, because of that, the cities covered in the book collectively constitute a microcosm of this metropolitan nation. When you learn about the cities, you also learn about the country in general especially the urban aspect of the United Kingdom as a highly

This book assesses Britain's handling of city growth during the First Industrial Revolution.

Why did the industrial revolution take place in eighteenth-century Britain and not elsewhere in Europe or Asia? In this convincing new account Robert Allen argues that the British industrial revolution was a successful response to the global economy of the seventeenth and eighteenth centuries. He shows that in Britain wages were high

land capital and energy cheap in comparison to other countries in Europe and Asia. As a result, the breakthrough technologies of the industrial revolution - the steam engine, the cotton mill, and the substitution of coal for wood in metal production - were uniquely profitable to invent and use in Britain. The high wage economy of pre-industrial Britain also fostered industrial development since more people could afford schooling and apprenticeships. It was only when British engineers made these new technologies more cost-effective during the nineteenth century that the industrial revolution would spread around the world.

Ireland 1839-1850 "Four bunches a penny, water-creases." London Labour and the London Poor is an extraordinary work of investigative journalism, a work of literature, and a groundbreaking work of sociology. Mayhew conducted hundreds of interviews with London's street traders, entertainers, thieves and beggars which revealed that the 'two nations' of rich and poor in Victorian Britain were much closer than many people thought. By turns alarming, touching, and funny, the pages of London Labour and the London Poor exposed a previously hidden world to view. the country, as the UK's only 'world city'. No other large country is anything like as economically and politically centralized. This concentration of power damages Britain's economy and fuels the sense of discontent felt by the millions of people for whom the capital seems like another planet. Yet it is cities that are fuelling economic growth around the world. Mike Emmerich looks at the DNA of cities and how it expresses itself in their institutions, governance, public services, religion and culture. He argues that the UK needs a devolutionary ratchet, allowing major cities the freedom to seek devolution of any area of public spending that is not inherently national in nature

(such as defence). Cities should have powers to raise some of their own taxes including business, property and sales based taxes and to increase them. He calls for sustained investment in transport and infrastructure, and also training. An innovation-centric industrial policy would also have an emphasis on the social fabric of cities and - crucially - their institutions.
