This post is about the dry sleeved IH diesel engines used in 806, 1206, 856, 1026, 1256 and 1456 tractors. These are the D361, DT361, D407 and DT407 engines. The sleeves in these engines are "dry" because they don't have any coolant against them. They are a replaceable block liner. They are very thin with a narrow flange at the top that fits a counter bore in the top of the block.

The International Harvester Company (IHC) has been building its own proprietary truck engines since the introduction of their first truck in 1907. International tended to use proprietary diesel engines. In the 1970s, IHC built the DVT 573 V-8 diesel of 240 and 260 hp (179 and 194 kW) but these were not highly regarded and relatively few were sold.
