(Music Pro Guide Books & DVDs). Thousands of people try to make it as freelancers in the music and audio industries. Most of them fail, and not because they lack talent or the will to succeed. They fail because no matter how much training they've received or how hard they've practiced, they don't know how to face the challenges that await them in the "real world." No matter how much technical or musical skill aspirants may have acquired, there is always a huge gap in their understanding of how that world works. Do they understand how to behave in a professional environment? When to talk and when to listen? What about developing a personal work ethic, a support system, and a reasonable set of immediate and future plans to make goals into realities? In his dual role as a successful music and audio freelancer of over 30 years and tenured college professor, Jim Klein has not only the knowledge of what it takes to succeed as a freelancer in the competitive fields of music and audio, but also the understanding of exactly what the new aspirant needs to know to take on that world. Klein has crafted his advice into a book that is detailed, complete, and easy to understand. Welcome to the Jungle includes chapters on setting goals, networking, building a portfolio, time management, personal and professional finances, and dealing with the ups and downs downs of the freelance career. The book also includes interviews with successful music and audio freelancers, such as legendary producer Howard Benson (Kelly Clarkson, Santana, Daughtry), producer/engineer Kevin Killen (Peter Gabriel, U2, Elvis Costello), bassist Julie Slick, and others.

This Special Issue contains a series of excellent research works on telecommunications and signal processing, selected from the 2018 41st International Conference on Telecommunications and Signal Processing (TSP) which was held on July 4–6, 2018, in Athens, Greece. The conference was organized in cooperation with the IEEE Region 8 (Europe, Middle East, and Africa), IEEE Greece Section, IEEE Czechoslovakia Section, and IEEE Czechoslovakia Section SP/CAS/COM Joint Chapter by seventeen universities from the Czech Republic, Hungary, Turkey, Taiwan, Japan, Slovak Republic, Spain, Bulgaria, France, Slovenia, Croatia, and Poland, for academics, researchers, and developers, and serves as a premier international forum for the annual exchange and promotion of the latest advances in telecommunication technology and signal processing. The aim of the conference is to bring together both novice and experienced scientists, developers, and specialists, to meet new colleagues, collect new ideas, and establish new cooperation between research groups from universities, research centers, and private sectors worldwide. This collection of 10 papers is highly recommended for researchers, and believed to be interesting, inspiring, and motivating for readers in their further research.

The Recording Guitarist explores the world of recording the guitar, covering everything from selecting guitars and amps to employing effects and mastering recording techniques in a variety of recording environments - from the modest home studio to a professional facility outfitted with pro-quality gear and a staff of engineers. Offering valuable insights and tips for the novice or professional, The Recording Guitarist thoroughly examines guitars (electric and acoustic) and amps used in the studio, and explains how to select among them to achieve the desired sound. The signal chain is explained, and signal processors (effects) are analyzed according to type, placement in the signal chain, and contribution to the overall mix. In addition to helping readers create a "total guitar sound" for the studio, the book also tackles recording equipment, techniques, and formats. Also included is advice from recording industry pros such as Carl Verheyen, Al Di Meola, Alex Lifeson, and Phil Ramone. A special feature is a section called Dial a Sound - an illustrated guide to the setups and recording rigs of 14 guitar greats, including Eric Johnson, Dimebag Darrell, Stevie Ray Vaughan, Jimi Hendrix, Eddie Van Halen, and others. Discusses: * Electric and acoustic guitars and their unique tones * Recording hardware and software * Effects and how to use them * Monitors * Overdubbing * Mixing
