"Blue Pelican Java" is a somewhat unusual high school computer science textbook. Most computer science texts will begin with a section on the history of computers followed with a flurry of definitions that are just "so many words" to the average student. The approach here is to first give the student some experience upon which to hang the definitions that come later. The usual practice of introducing classes and objects is deferred until the student has a firm grasp of the fundamentals (loops, decision structures, etc). Thus, the beginning student is not overwhelmed by the simultaneous introduction of OOPs and the fundamentals. The book includes plenty of exercises (many in "contest" form), programming projects, and a huge appendix.

America has always been a composite of racially blended peoples, never a purely white Anglo-Protestant nation. The Mexican American historian Neil Foley offers a sweeping view of the evolution of Mexican America, from a colonial outpost on Mexico's northern frontier to a twenty-first-century people integral to the nation they have helped build.

This text is a corpus-based university grammar with a Swedish perspective, written in English and aimed mainly at first-semester students of English at Swedish universities. It gives a thorough, yet easily accessible, introduction to the study of grammar and the building blocks of language: word classes, phrases, and clause elements.

"I have always had faith that the best writers will rise to the top, like cream, sooner or later, and will become exactly as well-known as they should be-their work talked about, quoted, taught, performed, filmed, set to music, anthologized. Perhaps, with the present collection, Lucia Berlin will begin to gain the attention she deserves." -Lydia Davis A MANUAL FOR CLEANING WOMEN compiles the best work of the legendary short-story writer Lucia Berlin. With the grit of Raymond Carver, the humor of Grace Paley, and a blend of wit and melancholy all her own, Berlin crafts miracles from the everyday, uncovering moments of grace in the Laundromats and halfway houses of the American Southwest, in the homes of the Bay Area upper class, among switchboard operators and struggling mothers, hitchhikers and bad Christians. Readers will revel in this remarkable collection from a master of the form and wonder how they'd ever overlooked her in the first place.

Intergalactic virus liquefy one of your heads? Feeling a bit "off" ever since you drove through that black hole? Then visit the ET-ER, the galaxy's leading medical facility. This interplanetary crew of doctors, nurses, paramedics, and technicians is uniquely qualified to cure what ails you. There's no planet too far, no asteroid too small, no patient too, well alien - and they accept most forms of insurance. This super-sized debut special includes two stories of medical madness that are out of this world.

Examines the complexity and the humanity of the opioid epidemic America's opioid epidemic continues to ravage families and communities, despite intense media coverage, federal legislation, criminal prosecutions, and harm reduction efforts to prevent overdose deaths. More than 450,000 Americans have died from opioid overdoses since the late 1990s. In Opioid Reckoning, Amy C. Sullivan explores the complexity of the crisis through firsthand accounts of people grappling with the reverberating effects of stigma, treatment, and recovery. Nearly everyone in the United States has been touched in some way by the opioid epidemic, including the author and her family. Sullivan uses her own story as a launching point to learn how the opioid epidemic challenged longstanding recovery protocols in Minnesota, a state internationally recognized for pioneering addiction treatment. By centering the voices of many people who have experienced opioid use, treatment, recovery, and loss, Sullivan exposes the devastating effects of a one-size-fits-all approach toward treatment of opioid dependency. Taking a clear-eyed, nonjudgmental perspective of every aspect of these issues—drug use, parenting, harm reduction, medication, abstinence, and stigma—Opioid Reckoning questions current treatment models, healthcare inequities, and the criminal justice system. Sullivan also imagines a future where anyone suffering an opioid-use disorder has access to the individualized care, without judgment, available to those with other health problems. Opioid Reckoning presents a captivating look at how the state that invented "rehab" addresses the challenges of the opioid epidemic and its overdose deaths while also taking readers into the intimate lives of families, medical and social work professionals, grassroots activists, and many others impacted by the crisis who contribute their insights and potential solutions. In sharing these stories and chronicling their lessons, Sullivan offers a path forward that cultivates empathy, love, and hope for anyone affected by chaotic drug use and its harms.
