### Function

What Is A Cell? -  
Definition, Structure,  
Types, Functions  
Cell Structure and  
Function: (i) Each  
organ in the living  
organisms performs  
different functions  
such as digestion,  
assimilation and  
absorption. Similarly,

# Online Library

## Notes Cell

different organs of a plant perform particular/ specialized functions. Example: roots help in the absorption of water and minerals.
