~~Snatchers 2: The Dead Don't Sleep by Shaun Whittington~~

Snatchers were members of an organisation of bounty hunters formed by Lord Voldemort when he seized control of the Ministry of Magic in the summer of 1997.1 It appeared to be a relatively informal organisation with the main purpose of rounding up or arresting Muggle-borns and "blood traitors" (when, at the time, simply being one made one an outlaw).1 However, they also responded when the Taboo ...

~~Snatchers 12 The Dead Dont Yell~~

The story concerns two medical students in Edinburgh who manage dissection for their teacher, a thinly disguised anatomist Dr. Robert Knox, who purchased cadavers from the infamous murderers William Burke and William Hare. The characters Fettes and Macfarlane serve as a prototype for both Jekyll and Hyde, in Stevenson's novel published two years later in 1886.

~~Snatchers 12 The Dead Dont Yell~~

Invasion of the Body Snatchers (1956) is a low-budget science fiction film that has become a classic. The suspense of the film lies in discovering, along with Miles, the central character (played by Kevin McCarthy), who is "real" and who is not, and whether Miles and Becky (played by Dana Wynter) will escape the pod takeover. As the center of the film moves outward from a small-town group of neighbors to the larger political scene and institutional network (of police, the FBI, hospital workers), the ultimate question is whether "they" have taken over altogether. Although Invasion can be interpreted in interesting ways along psychological and feminist lines, its importance as a text has centered primarily on political and sociological readings. In his introduction to this volume, Al LaValley explores the politics of the original author of the magazine serial story on which the film is based, Don Siegel; and of its screenwriter, Daniel Maimwaring. And he looks at the ways the studio (Allied Artists) tried to neutralize certain readings by tacking on an explanatory frame story. The commentary section includes readings by Stephen King, Peter Biskind, Nora Sayre, and Peter Bogdanovich. A section of postproduction documents reproduced here (many for the first time) includes many written by Wanger and Siegel. The volume also contains two previously unpublished framing scripts written for Orson Welles. For students and individual enthusiasts, the contextual materials are particularly interesting in showing how crucial the postproduction history of a film can be. A filmography and bibliography are also included in the volume. Al LaValley is the director of film studies at Dartmouth. He is the author of many articles on film and editor of Mildred Pierce in the Wisconsin screenplay series.

Looks at the effectiveness of the prostatectomy and surveys the latest research in prostate cancer management.

Every year almost a quarter of a million confused and frightened American men are tossed into a prostate cancer cauldron stirred by salespeople representing a multibillion-dollar industry. In this flourishing business, the radical prostatectomy is still the most widely recommended treatment option. Yet a recent and definitive study in the New England Journal of Medicine concluded that out of the fifty thousand prostate operations performed annually, more than forty thousand are unjustified. But this is no surprise given that 99 percent of all doctors treating this disease are surgeons or radiation therapists. The appalling fact is that men are still being rushed into a major operation that rarely prolongs life and more than half the time leaves them impotent. Invasion of the Prostate Snatchers is a report on the latest thinking in prostate cancer therapy: close monitoring-active surveillance rather than surgery or radiation-should be the initial treatment approach for many men. There are three stages of prostate cancer and this book will provide accurate information about how to distinguish between them: Low-Risk, which requires no immediate treatment; Intermediate-Risk, which will benefit from surgery, radiation, and/or hormonal therapy; and High-Risk, a type that does require immediate treatment with a combination of therapies. In a unique collaboration, doctor and patient provide a wholly new perspective on managing this disease. Ralph Blum's account of his personal struggle, together with Dr.Mark Scholz's presentation of newscientific advances, provides convincing evidence that this noninvasive approach can be crucial in preventing tens of thousands of men from being overtreated every year. Invasion of the Prostate Snatchers serves as an indispensable map through the medical minefield of prostate cancer.

Ruben Prien is attempting to prevent World War I, but the man carrying papers to America that might avert the catastrophe is traveling aboard the Titanic

For fans of SF and horror films, will there ever be a decade to compare with the 1950s? Actors, directors, producers, and crews prevailed over microbudgets and four-day shooting schedules to create enduring films. This book turns a long-overdue spotlight on many who made memorable contributions to that crowded, exhilarating filmmaking scene. John Agar, Beverly Garland, Samuel Z. Arkoff, Gene Corman, and two dozen more reminisce about the most popular genre titles of the era. Lengthy, in-depth interviews feature canny questions, pointed observations, rare photos, and good fun.

The people who directed, produced, and starred in the scary and fantastic movies of the genre heyday over thirty years ago created memorable experiences as well as memorable movies. This McFarland Classic brings together over fifty interviews with the directors, producers, actors, and make-up artists of science fiction and horror films of the 1940s, 1950s, and 1960s. From B movies to classics, Samuel Z. Arkoff to Acquanetta, these veteran vampire baits, swamp monsters, and flying saucers attackees share their memories. This classic volume represents the union of two previous volumes: Interviews with B Science Fiction and Horror Movie Makers ("more fun than the lovably cheap movies that inspired it" --Booklist/RBB); and Science Fiction Stars and Horror Heroes ("candid...a must" --ARBA). Together at last, this combined collection of interviews offers a candid and delightful perspective on the movies that still make audiences squeal with fear, and occasionally, howl with laughter.

Dracula and Frankenstein's Monster are horror cinema icons, and the actors most deeply associated with the two roles also shared a unique friendship. Bela Lugosi and Boris Karloff starred in dozens of black-and-white horror films, and over the years managed to collaborate on and co-star in eight movies. Through dozens of interviews and extensive archival research, this greatly expanded new edition examines the Golden Age of Hollywood, the era in which both stars worked, recreates the shooting of Lugosi and Karloff's mutual films, examines their odd and moving personal relationship and analyzes their ongoing legacies. Features include a fully detailed filmography of the eight Karloff and Lugosi films, full summaries of both men's careers and more than 250 photographs, some in color.

When Matt Ryan took the Raintree case, it seemed routine. He changed his mind when people he questioned were found dead with the word "hangman" written in their blood. Then the killer came after Matt. In this "film noir" flavored novel, a world weary detective races against time to solve a dark and bloody twenty year old mystery before he becomes one of the dead.
