This revised edition of a now classic text includes a new introduction by Henry Jenkins, explaining 'Why Fiske Still Matters' for today's students, followed by a discussion between former Fiske students Ron Becker, Elana Levine, Darrell Newton and Pamela Wilson on the theme of 'Structuralism and Semiotics, Fiske-Style'. Both underline the continuing relevance of this foundational text in communication studies. How can we study communication? What are the main theories and methods of approach? This classic text provides a lucid, accessible introduction to the main authorities in the field of communication studies, aimed at students coming to the subject for the first time. It outlines a range of methods of analysing examples of communication, and describes the theories underpinning them. Thus armed, the reader will be able to tease out the latent cultural meanings in such apparently simple communications as news photos or popular TV programmes, and to see them

with new eyes.

The Third Edition of this much celebrated textbook continues to focus on the four major and influential perspectives in contemporary social psychology - social cognition, social identity, social representations, and discursive psychology. A foundational chapter presenting an account of these perspectives is then followed by topic-based chapters from the point of view of each perspective in turn, discussing commonalities and divergences across each of them. Key Features of the Third Edition: - Now includes coverage of the social neuroscience paradigm and research on implicit social cognition - Updated pedagogical features and visual material - An extended conclusion covers the ways in which the different approaches of the field intersect as well as a general discussion of the direction in which the field is moving. Social Cognition: An Integrated Introduction is an integrative, holistic textbook that will enhance the reader's understanding of social cognition and of each of the topical issues considered. It remains a key textbook for psychology students, particularly those on courses in social psychology and social cognition.
