The sacred Flower of Life pattern, the primary geometric generator of all physical form, is explored in even more depth in this volume, the second half of the famed Flower of Life workshop. The proportions of the human body, the nuances of human consciousness, the sizes and distances of the stars, planets and moons, even the creations of humankind, are all shown to reflect their origins in this beautiful and divine image. Through an intricate and detailed geometrical mapping, Drunvalo Melchizedek shows how the seemingly simple design of the Flower of Life contains the genesis of our entire third-dimensional existence. From the pyramids and mysteries of Egypt to the new race of Indigo children, Drunvalo presents the sacred geometries of the Reality and the subtle energies that shape our world. We are led through a divinely inspired labyrinth of science and stories, logic and coincidence, on a path of remembering where we come from and the wonder and magic of who we are. Finally, for the first time in print, Drunvalo shares the instructions for the Mer-Ka-Ba meditation, step-by-step techniques for the re-creation of the energy field of the evolved human, which is the key to ascension and the next dimensional world. If done from love, this ancient process of breathing prana opens up for us a world of tantalizing possibility in this dimension, from protective powers to the healing of oneself, of others and even of the

planet. Embrace the expanded vision and understanding that Drunvalo offers to the world. Coincidences abound, miracles flourish and the amazing stories of mysteries unveiled arise as the author probes the Ancient Secrets of the Flower of Life.

Lee Smolin offers a new theory of the universe that is at once elegant, comprehensive, and radically different from anything proposed before. Smolin posits that a process of self organization like that of biological evolution shapes the universe, as it develops and eventually reproduces through black holes, each of which may result in a new big bang and a new universe. Natural selection may guide the appearance of the laws of physics, favoring those universes which best reproduce. The result would be a cosmology according to which life is a natural consequence of the fundamental principles on which the universe has been built, and a science that would give us a picture of the universe in which, as the author writes, "the occurrence of novelty, indeed the perpetual birth of novelty, can be understood." Smolin is one of the leading cosmologists at work today, and he writes with an expertise and force of argument that will command attention throughout the world of physics. But it is the humanity and sharp clarity of his prose that offers access for the layperson to the mind bending space at the forefront of today's physics.

God's Solution demolishes the anti religious arguments of Richard Dawkins, Sam Harris, Daniel Dennett, Peter Singer and atheism's other polemicists who have scurried aboard this lucrative bandwagon. God's Solution begins by showing us that science, not religion, has always been war's harlot. God's Solution then proceeds to show how and why sacred scripture makes sense and how the secular ideologies raged against it have always brought out the worst in people. God's Solution then demolishes Darwinism as a scientific theory and denounces Darwin as the racist bigot that he was. God's Solution uses a wide array of examples to show that Mother Nature is much too varied to be shoehorned into a simplistic theory like evolution. God's Solution then uses the charity industry to show that religion, not atheism holds the moral high ground. In using the arguments of the secular jihadists to show how life without religion is meaningless, God's Solution will prove a valuable resource to all readers who honestly seek the scientifically grounded metaphysical truths of their own inherited faith and who wish to imbue their children and grandchildren with those same beliefs.

now more and more people are hearing an inner call that cannot be ignored. This calling is an urgent reminder that we must get to work healing ourselves and the planet. All too often, though, we get distracted by material temptations and painful beliefs that create amnesia, fear, and self-doubt in us. This book will help you get back on track with your soul purpose.

We are living in challenging times. And it is easy to escape, pine for the "good old days," or unrealistically dream our way into the future. Instead, we are invited, in this book, to face our troubled world, to identify our inner struggles of faith, and to voice our anxieties and pain. And most importantly we are invited to wrestle with the God who so often seems absent. Living with a fragile hope, we are called by the gospel to nurture an inner life that responds with faith and courage to the brokenness of our world and the woundedness of our inner being.
