I had to take Business Calculus for my degree and this book really helped me learn Calculus. It has all the answers and work through for the odd problems, which if you are in college is what 99% of the math professors tell you to do as homework, and I bought it at a good price

MATHEMATICAL APPLICATIONS FOR THE MANAGEMENT, LIFE, AND SOCIAL SCIENCES, 10th Edition, is intended for a two-semester applied calculus or combined finite mathematics and applied calculus course. The book's concept-based approach, multiple presentation methods, and interesting and relevant applications keep students who typically take the course—business, economics, life sciences, and social sciences majors—engaged in the material. This edition broadens the book's real-life context by adding a number of environmental science and economic applications. The use of modeling has been expanded, with modeling problems now clearly labeled in the examples. Also included in the Tenth Edition is a brief review of algebra to prepare students with different backgrounds for the material in later chapters. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This guide contains solutions to selected problems from the text, including odd-numbered exercises from the end-of-section exercise sets, as well as odd- and even-numbered exercises from the Chapter Reviews and Chapter Tests. In addition, this guide provides extra Supplementary Exercises with accompanying answers that reinforce the concepts and techniques presented in the text.

KEY BENEFIT: Harshbarger/Yocco's College Algebra in Context with Applications for the Managerial, Life, and Social Sciences, Third Edition uses modeling and real-data problems to develop the skills that readers will need for their future courses and careers. Applications anticipate the math that readers will encounter in their professional lives, giving them the practice they need to become adept problem-solvers. Every chapter begins with the Algebra Toolbox, which reviews the skills and concepts necessary to master the material ahead. This new full-color edition offers a greater number of technology tips, and the content has been reorganized to accommodate a wide range of course syllabi. KEY TOPICS: Functions, Graphs, and Models; Linear Models, Equations and Inequalities; Quadratic and Other Nonlinear Functions; Additional Topics with Functions; Exponential and Logarithmic Functions; Higher-Degree Polynomial and Rational Functions; Systems of Equations and Inequalities; Matrices; Special Topics MARKET: For all readers interested in college algebra.

When John Bandicut encounters an alien intelligence on Neptune’s moon Triton, his life changes irrevocably. Urged by the alien quarx now sharing his mind, he accepts an audacious mission—to steal a ship and hurtle across the solar system in a desperate bid for Earth’s survival. Book 1 of The Chaos Chronicles, by the Nebula-nominated author of Eternity’s End—with an Afterword by the author. Appeared in print from Tor Books. DRM-free ebook edition. REVIEWS: One of the best SF novels of the year — Science Fiction Chronicle “Masterfully captures the joy of exploration.” — Publishers Weekly “One of the very best things Carver has written, a traditional adventure filled with mystery and wonder and featuring a likable and believable protagonist thrust onto a stage for which he is ill prepared.” — Science Fiction Chronicle “Jeff Carver is a hard sf writer who gets it right—his science and his people are equally convincing. Neptune Crossing combines his strengths, from a chilling look at alien machine intelligence, to cutting-edge chaos theory, to the pangs of finite humans in the face of the infinite. If you like intriguing ideas delivered in an exciting plot, this is your meat.” —Gregory Benford, author of the Galactic Center series “Reveals an alien encounter brushing hard against a soul, and takes us from there to the far reaches of the cosmos, all with the sure touch of a writer who knows his science. Jeff Carver has done it again!” —David Brin, author of Existence “A complex and believable protagonist—an ordinary man rising to extraordinary circumstances—and an alien presence that is at once convincingly strange and deeply real. I’m really glad to have read this one.” —Melissa Scott, author of Dreamships and Trouble and Her Friends “A roaring, cross-the-solar-system adventure of the first water. The kind of stuff that made us all love science fiction.” —Jack McDevitt, author of Seeker and Chindi “High-octane space adventure: mystery, humor, theoretical physics, and one of the more interesting SF aliens you’ve likely encountered in a long while.” —Allen Steele “With works such as The Infinity Link... and his popular Star Rigger novels, Carver won acclaim as a master craftsman of compelling hard science fiction. This captivating opener to a new series incorporating the emerging science of chaos theory should keep that reputation flourishing... Carver has created yet another electrifying scenario as well as a winning combination in Bandicut and the sometimes vulnerable yet superintelligent quarx. First-rate entertainment.” — Booklist

Check your work and reinforce your understanding with this manual, which contains complete solutions for all odd-numbered exercises in the text.

"E-Commerce 2015"" is intended for use in undergraduate and graduate e-commerce courses in any business discipline. "" ""The market-leading text for e-commerce "This comprehensive, market-leading text emphasizes the three major driving forces behind e-commerce—technology change, business development, and social issues—to provide a coherent conceptual framework for understanding the field.
