The Cambridge Book of Magic is an edition of a hitherto unpublished sixteenth-century manuscript of necromancy (ritual magic), now in Cambridge University Library. Written in England between 1532 and 1558, the manuscript consists of 91 'experiments', most of them involving the conjuration of angels and demons, for purposes as diverse as knowing the future, inflicting bodily harm, and recovering stolen property. However, the author's interests went beyond spirit conjuration to include a variety of forms of natural magic. The treatise drew on astrological image magic and magico-medical texts, and the author had a particular fascination with the properties of plants and herbs. The Cambridge Book of Magic gives an insight into the practice and thought of one sixteenth-century magician, who may have been acting on behalf of clients as well as working for his own benefit.

The story of the beliefs and practices called 'magic' starts in ancient Iran, Greece, and Rome, before entering its crucial Christian phase in the Middle Ages. Centering on the Renaissance and Marsilio Ficino - whose work on magic was the most influential account written in premodern times - this groundbreaking book treats magic as a classical tradition with foundations that were distinctly philosophical. Besides Ficino, the premodern story of magic also features Plotinus, Iamblichus, Proclus, Aquinas, Agrippa, Pomponazzi, Porta, Bruno, Campanella, Descartes, Boyle, Leibniz, and Newton, to name only a few of the prominent thinkers discussed in this book. Because pictures play a key role in the story of magic, this book is richly illustrated.
