However, because most issues in

This open access book focuses on explaining differences amongst organizations regarding various attributes, forms, and outcomes. By focusing on the “how” of new venture creation and management to produce well-established organizations, the

Acces PDF Venture Strategy Solutions

authors aim to increase our understanding of the antecedents of most management research assumptions. New ventures are the source of most newly created jobs generated in an economy, new industries and markets, innovative products and services,

Acces PDF Venture Strategy Solutions

and new solutions to economic, social, and environmental problems. However, most management research assumes a well-established organization as the starting point of their theorizing. Building on the notion of guided attention, it details how

Acces PDF Venture Strategy Solutions

entrepreneurs can allocate their transient attention to identify potential opportunities from environmental change and how entrepreneurs allocate their sustained attention to form beliefs about radical and incremental opportunities

Acces PDF Venture Strategy Solutions

requiring entrepreneurial action. The authors explain how entrepreneurs build such communities and engage community members over time to co-construct potential opportunities for new venture progress. Using the lean startup

Acces PDF Venture Strategy Solutions

framework, they connect the dots between the theorizing on identifying and co-constructing potential opportunities and the startup of new ventures. This leads to a new overarching framework based on are (1) co-creating a startup, (2) organizing

Acces PDF Venture Strategy Solutions

a startup, and (3) performing a startup to bring together the many disparate threads of research on new ventures. The authors then theorize on the importance of knowledge in organizational scaling. Based on cutting-edge research from the

In this engaging and practical book, authors Lisa K. Gundry and

This book investigates the transfer of technology from basic research to society. When transferring technology, two main ways may arise: licensing out the

further exploitation rights straight from the University departments to the industry or joining the technology a step beyond into market applications for products and services development, through spin-off and startup companies. This book focuses on
