Our earth has natural electromagnetic energy, and over millions of years we have evolved to live in harmony with it. In our modern world, however, human-made electromagnetic fields are increasingly common -- wifi and mobile phone networks, for example. Katie Singer argues that these fields are now so prevalent that they are threatening the health of all aspects of our world -- people, plants, bees and birds -- and in particular our memory, DNA,

gesture, Katie had left the sexy wizard Owen Palmer to battle his demons in the magical realm—after all, Katie just seemed to attract evil, which only made Owen's job a lot harder. But now it seems that trouble has followed her home: Despite the fact that Merlin, Katie's old boss at Magic, Spells, and Illusions, Inc., has assured her that Cobb is free of enchantmen, (magically speaking), Katie begins to notice curious phenomena. Cobb is being plagued by a series of inexplicable petty crimes and other devilish mischief, and after her experiences in Manhattan, Katie knows

"unauthorized magic" when she sees it. As this new darkness strikes deep in the heart of Texas, Owen appears (literally) to investigate. Now Katie's friends and family must show the bad guys why it's bad luck to hex with Texas, while Katie and Owen combine their strengths like never before to uncover a sinister plot before evil takes root in the Lone Star State.

a very clearly written and accessible manner. It is particularly good at capturing the exciting possibilities that will occur as sensor networks merge with cloud-based 'big data' analytics to provide a host of new applications that will impact directly on the individual in ways we cannot fully predict at present. It really brings this home through the use of carefully chosen case studies that bring the overwhelming concept of 'big data' down to the personal level of individual life and health." Dermot Diamond
