Also includes enlightening articles on today's MBA degree, admissions and application advice, new business programs, and more.

The goal of teaching online is fundamentally the same as teaching face-to-face: facilitating the learning of all students to the greatest extent possible. This book differs from other books on online teaching in that, in the process of offering guidance on course design and planning, developing outcomes and appropriate engaging activities, managing the workload and assessment, the authors pay explicit attention throughout to the distinct and diverse needs of students and offer effective strategies to accommodate them in a comprehensive and inclusive way by using the principles of Universal Design for Learning. By following those principles from the outset when planning a course, all students will benefit, and most particularly those whom the research shows have the greatest achievement gaps when taking online courses -- males, first generation and low income students, those from underrepresented minority groups, the academically underprepared, students with disabilities, and those with limited online access or lacking readiness for online learning. Beyond good planning and design, Kelly and Zakrajsek offer ideas for creating inclusive course environments and activities, such as using culturally appropriate content and making it accessible in multiple formats. They also share methods to foster faculty-learner interaction and increase personal connections with students, and among students, through group activities or learning communities, which are so critical to motivation and success. Faculty new to online teaching as well as more experienced readers will find a wealth of practical guidance on developing and honing both fully online and blended courses and, as importantly, a wealth of proven ideas to help the new generation of students with diverse needs to succeed.

For courses in biochemistry. Engage students in biochemistry visually and through real-world applications Biochemistry: Concepts and Connections engages students with a unique approach to visualization, synthesis of complex topics, and connections to the real world. The author team builds quantitative reasoning skills and provides students with a rich, chemical perspective on biological processes. The text emphasizes fundamental concepts and connections, showing how biochemistry relates to practical applications in medicine, agricultural sciences, environmental sciences, and forensics. The newly revised 2nd Edition integrates even more robust biochemistry-specific content in Mastering(tm) Chemistry, creating an interactive experience for today's students. New Threshold Concept Tutorials help students master the most challenging and critical ideas in biochemistry, while Interactive Case Studies connect course material to the real world by having students explore actual scientific data from primary literature. The 2nd Edition provides a seamlessly integrated learning experience via text, Mastering Chemistry, and an interactive Pearson eText. Also available with Mastering Chemistry Mastering(tm) is the teaching and learning platform that empowers you to reach every student. By combining trusted author content with digital tools developed to engage students and emulate the office-hour experience, Mastering personalizes learning and often improves results for each student. Students can further master concepts after class through traditional and adaptive homework assignments that provide hints and answer-specific feedback. The Mastering gradebook records scores for all automatically graded assignments in one place, while diagnostic tools give instructors access to rich data to assess student understanding and misconceptions. Note: You are purchasing a standalone product; Mastering Chemistry does not come packaged with this content. Students, if interested in purchasing this title with Mastering Chemistry , ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. 013480466X / 9780134804668 Biochemistry: Concepts and Connections Plus Mastering Chemistry with Pearson eText -- Access Card Package Package consists of: 0134641620 / 9780134641621 Biochemistry: Concepts and Connections 013474716X / 9780134747163 Mastering Chemistry with Pearson eText -- ValuePack Access Card -- for Biochemistry: Concepts and Connections

Presents a multifaceted model of understanding, which is based on the premise that people can demonstrate understanding in a variety of ways.

Builds solid reading comprehension, writing, and vocabulary skills. Helps students beat the test "jitters" and approach questions confidently.

At a time when Americans are debating the future of public education, Johann N. Neem tells the inspiring story of how and why Americans built a robust public school system in the decades between the Revolution and the Civil War. It ' s a story in which ordinary people in towns across the country worked together to form districts and build schoolhouses and reformers sought to expand tax support and give every child a liberal education. By the time of the Civil War, most northern states had made common schools free, and many southern states were heading in the same direction. Americans made schooling a public good. Yet back then, like today, Americans disagreed over the kind of education needed, who should pay for it, and how schools should be governed. Neem explores the history and meaning of these disagreements. As Americans debated, teachers and students went about the daily work of teaching and learning. Neem takes us into the classrooms of yore so that we may experience public schools from the perspective of the people whose daily lives were most affected by them. Ultimately, Neem concludes, public schools encouraged a diverse people to see themselves as one nation. By studying the origins of America ' s public schools, Neem urges us to focus on the defining features of democratic education: promoting equality, nurturing human beings, preparing citizens, and fostering civic solidarity.

Prepare for success on your HESI exit exam and the NCLEX-RN? HESI Comprehensive Review for the NCLEX-RN? Examination, 4th Edition provides a comprehensive, all-in-one review of the information you need to know. Written in an easy-to-read outline format, this study tool breaks down chapters by clinical areas and concepts emphasized on the NCLEX-RN exam. Rationales are provided for any incorrect answers or areas of weakness. Building Sustainable Futures for Adult Learners is an edited and refereed collection of papers published in conjunction with the joint Adult Higher Educational Alliance (AHEA) and American Association of Adult and Continuing Education Conferences (AAACE). This book is the third in a series of scholarly publications associated with the annual AHEA conference. The book is arranged thematically according to the topics of submissions. Building Sustainable Futures is important because it fills a unique niche in the field of adult education, extends the scope of AHEA to a larger audience, and offers a current volume for scholars and practitioners based on both research and practice-based research.
